EXPERIENCE

10/18 – PRESENT

SOFTWARE DEVELOPER, COOK SYSTEMS – NASHVILLE, TN

As a FastTrack'd developer at Cook Systems, I was responsible for learning and utilizing various programming languages and frameworks in order to build several fully functional projects including:

- Smart Share – A file sharing application built with Java/C# and utilized Hibernate/EF respectively. This project was revisited in order to
- Social Media API – A twitter-like Restful Web API which included a Relational Database.
- Dev Duel – A full stack application built with Node.js that compares GitHub accounts and determines the "better" developer.
- Drive Storage – A team based, file storage project built using React, Redux and Java.
